

What equipment is right for me? New, Refurbished, Used

A number of factors need to be considered when purchasing used equipment for your program. Functionality, what do you want it to do; just light up or actually function. Safety has to be a major decision. MRG will never provide substandard or unsafe equipment; the safety of your students is our primary concern.

Often times we have access to manufactures "scratch and dent" which provides new equipment at dramatically reduced cost. We will consult with you on the best options for your program and budget.

Need assistance in planning a new facility or upgrading your current. MRG will work with you on floor plans, equipment list, budgets, and installation of all of your equipment needs. Our objective is to provide you with the information and tools necessary to bring your project in on time and budget.
